Welding Safety

3M™ Speedglas™ Welding Helmet G5-03

Versatility to upgrade your performance

3M Science. Applied to life.™

Farwell to compromises

Are you a professional welder who performs a variety of welding and grinding tasks?

You need a welding helmet versatile enough so that you do not have to compromise on function, performance OR safety.

That's why we have designed the 3M™ Speedglas™ Welding Helmet G5-03.

Versatility to upgrade your performance!

This welding helmet is designed for the welder who may need...

...filtered air¹⁾

...an excellent view

...protection against arc welding radiation²⁾

...to perform grinding tasks

...a comfortable and well-balanced helmet

...safety helmet compatibility³⁾

The helmet features an option of three different auto darkening and four shades of passive welding filter⁴⁾:

Variable colour

Light state 2,5
+ Tack welding

Natural colour

Passive

1) G5-03 Pro Air only

2) Protection against radiation caused by welding light (UV, IR and visible radiation)

3) G5-03 Pro only

4) Availability may vary between model and area

One great design...

Designed for the professional welder, 3M Speedglas™ G5-03 Series welding helmets offer modularity and multiple choice of accessories.

Common parts with G5-01

Accessories, welding filters, protection plates

3M™ Speedglas™ Welding Helmet
G5-03 Pro

Great clarity before, during and after welding

With 3M™ Speedglas™ Natural Colour Technology colours appear brighter and more realistic in both the light and dark states. A more realistic view may enable:

Accuracy

Recognize colour and contrast and see more details when using the welding filter.

Productivity

Better focus on the welding setup, welding technique and inspection of just-completed welds.

Quality

May help to increase the quality and precision of the welds.

Dark state 8 at setting A

Dark state 8 at setting B

Dark state 8 at setting C

Customize the filter colour

To provide even better view and control of your weld puddle, joint and arc choose our filter with the 3M™ Speedglas™ Variable Colour Technology. It changes the colours seen through the welding filter in the dark state.

When not welding, the filter displays colours as they appear naturally (Natural Colour Technology).

You can switch between three different filter colours depending on welding method and work piece material.

Choose the welding filter most suitable for your work and preference

3M offers a range of updated* auto-darkening filters and passive-lens alternatives. For maximum benefit, 3M™ Speedglas™ G5-01 filters also fit the G5-03 helmet and vice versa.

The image shows the front view of a 3M Speedglas G5-01/03VC auto-darkening filter. The lens displays a green-tinted view of a welding process. The control panel below the lens features a 'TAP' button, a 'SHADE' dial with a plus sign, a 'SENS' dial with a plus sign, and a 'DELAY' dial with a plus sign. A 'Bluetooth' icon is visible on the right side of the panel. To the right of the filter, there are three circular icons: 'Natural Color Technology' (a rainbow circle), 'Variable Dark State Colors' (a circle with three colored dots), and 'function.' (a circle with a plus sign).

G5-01/03VC (variable colour)

- Variable colour technology with three selectable colours in dark state
- TAP function
- Shade 14 settings for higher amp welding
- Four arc-detection sensors
- Bluetooth connection

The image shows the front view of a 3M Speedglas G5-01/03TW auto-darkening filter. The lens displays a yellow-tinted view of a welding process. The control panel below the lens features a 'TAP' button, a 'SHADE' dial with a plus sign, a 'SENS' dial with a plus sign, and a 'DELAY' dial with a plus sign. A 'Bluetooth' icon is visible on the right side of the panel. To the right of the filter, there are two circular icons: 'Natural Color Technology' (a rainbow circle) and 'function.' (a circle with a plus sign).

G5-01/03TW (tack welding)

- Light state 2.5
- TAP function
- Four arc-detection sensors
- Bluetooth connection

The image shows the front view of a 3M Speedglas G5-01/03NC auto-darkening filter. The lens displays a green-tinted view of a welding process. The control panel below the lens features a 'SHADE' dial with a plus sign, a 'SENS' dial with a plus sign, and a 'DELAY' dial with a plus sign. A 'Bluetooth' icon is visible on the right side of the panel. To the right of the filter, there is one circular icon: 'Natural Color Technology' (a rainbow circle).

G5-01/03NC

- Locks manually in light state for grinding
- Locks manually in shade 5 for cutting
- 3 arc-detection sensors

The image shows the front view of a 3M Speedglas G5-01/03-Passive passive lens. It is a simple black rectangular frame with a clear lens in the center.

G5-01/03-Passive

- Shade 11 (also available shade 10,12,13)

* Launch date may vary between model and area

Enhance your grinding

The 2.5* light state in combination with an optional task light will allow you to grind with increased visibility. The TAP function allows for quick and easy switching between welding and GRIND (or CUT) mode.

Light state 2.5

TAP function

Task light

*2.5 state is only on the TW ADF

Tap on the side of the welding helmet, with or without a glove, to easily switch between grind (or cut) mode and weld mode.

Easy switching is just a tap away

Switch quickly between modes (GRIND/CUT and WELD) by simply tapping the side of the helmet with your hand – even when wearing gloves.

The TAP function is robust and intuitive, and can be inactivated whenever needed by simply pressing the ADF buttons.

Built into the G5-01/03TW and G5-01/03VC welding filters, the TAP function may help to improve productivity with button-less control.

1
Use the interface on the filter to set if you want to use TAP function with grind or cut mode.

2
TAP 3 times on the side of the welding helmet to switch between GRIND and WELD mode or CUT and WELD mode.

3
The filter will switch to desired setting.

4
Tap again and the filter switches back to welding mode.

Adjustable air distribution and air flow control

Direct the air flow over your face, head, or both. Optimized air distribution and air flow-control helps prevent your eyes from drying out. All this leads to increased comfort in your helmet.

Right side control

Direct the airflow to either your face, your visor, or some combination of both.

Left side control

Adjust the amount of air coming from the top outlet vs. the two side outlets, or choose a blend of both.

Your choice of powered or supplied air

3M offers a range of powered and supplied air respirators that both provide protection against harmful welding fumes while increasing the comfort around your face and head.

Learn more about
powered and supplied
air choices on page 18

3M™ Speedglas™ Welding Helmet G5-03 Pro

We have you covered

Sometimes you weld in a location that requires you to wear a safety helmet. Using a quick release system, the G5-03 Pro helmet can be utilised with an adaptor to securely and easily attach the welding helmet to various 3M safety helmets.

The adjustable adaptors lets you attach your welding helmet to 3M selected safety helmets.

Learn more about safety helmet choices on page 18

3M™ Speedglas™ Heavy Duty Backpack

Helping to improve performance and life for welders

Some welders prefer to wear a heavy duty PAPR Backpack, which hold the Powered Air Purifying Respirator (PAPR) flat against your back and can make it easier to move around some workspaces.

The heavy duty backpack is designed for welding applications and the 3M™ Adflo PAPR and aims to provide comfort, light weight, robustness, stability and good perceived balance.

New features:
 TAP settings
 Additional stats
 View serial number
 Theft marking (engrave owner info)
 Export data

3M™ Connected Equipment App

Get the most from your G5-03 welding helmet by connecting it to the 3M equipment app.

- Set up your equipment
- Get reminders for maintenance
- Have instant access to user manuals
- Program memory modes for dark shades, sensitivity, delay and more
- Log ADF activity like hours on, hours in dark state, or number of on/off cycles

Bluetooth®

The Bluetooth connection to the welding helmet to gives you the possibility to:

- Extract usage data
- Update firmware
- Review helmet maintenance logs

Designed to provide a uniform light at welding working distance.

Light Up Your Workspace

The optional helmet-mounted task light may help welders stay productive in poorly lit areas. It delivers a better view of the work area before and after welding, which may help to reduce fatigue.

3M™ Speedglas™ Task Light is designed to be low profile and lightweight, helping welders in low light environments.

For welders requiring air delivery, the task light can be connected to 3M™ G5-03 Pro Air and is powered by the 3M™ Adflo™ powered air respirator, reducing the need for an additional battery and enabling extended run times.

For welders using the G5-03 Pro, a battery pack is available which connects to the rear of the welding helmet for a balanced fit.

Powered by the Adflo

Separate rechargeable battery

Welding Safety in focus

3M™ Speedglas™ Welding Helmet G5-03 Pro Air is certified TH3 (CE). This level of protection significantly reduces exposure to welding respiratory hazards when the helmet is used full time.

3M Speedglas Welding helmet G5-03 Pro with Safety helmet adapters is designed and tested to be used with selected 3M Safety helmets series X5000, G3000 and H700. 3M Speedglas Welding helmet G5 03 Pro can be used with 3M passive air purifying respirator solutions, e.g. 3M™ Particulate Respirator Aura™ Series.

Feel the safety of a certified protection system!

Extend Your Protection

Do you require additional protection from heat, radiation, spatter and sparks? There is a range of extended coverage options available to give you a more comfortable and protective environment.

① Scrape guard*

Helps to protect the welder against head scrapes.

② Head cover

Increase coverage of your head by adding a fabric head cover

③ Neck Protection

Interchangeable lower part of the welding helmet (plough) allows welders to customize neck protection according to their welding situation depending on head size, working position, and working application.

Spark Protection

Flame-retardant fabrics protect the welder from sparks and spatter.

> Learn more about our range of extended head and neck protection on page 17

To maximize coverage from sparks, add the fabric shroud and the extended, larger fabric head protection

Common parts between G5-01 and G5-03

For ease of flexibility onsite, many G5-01 spare parts are also compatible with G5-03. This allows you to hold less spare inventory, while retaining the flexibility you need to customise your equipment.

All parts common with G5-01 is marked with a dot (•) after the parts number.

Example: 16 90 30 • Shroud
